Lim Xiao Mun, Yuki

b. 1995, Kuala Lumpur, Malaysia

My art concepts mostly related to social, political issues with multicultural background and influence by experiences of the daily life through the self-observation within now and past memories for the purpose to create art.

My intention is to use my interpretation in art to transform thoughts into visual form, deliver message at the same time questioning or as an awareness to benefit the society.

The body of work includes paradoxical, dark and humorous for people with some other perspective. It allowed viewer to form personal thoughts and feelings. Also invites viewers to make or include their own point of view.
